

IDAHO WHEAT VARIETIES

Released: July 11, 2003

2003 IDAHO WHEAT VARIETIES – SUPPLEMENT

During the 2003 survey, we collected positive reports for 97 different wheat varieties. The top twenty varieties account for 76.9 percent of the wheat planted in Idaho for the 2003 crop. This supplement lists estimates for 32 additional varieties which account for 19.4 percent of Idaho's total wheat planted. Durum wheat varieties are not included since durum wheat is not part of Idaho's wheat acreage estimates.

Included in the report are acreages of wheat in which multiple varieties were mixed at seeding. A total of 15 combinations of soft white winter varieties were reported, a majority of which included Madsen.

Partial funding for the 2003 Idaho Wheat Variety Survey was provided by the Idaho Wheat Commission.
